PERFORMANCE SPACES FOR THE 21ST CENTURY

Soundstage Capabilities
Our new facility

PS21’s new facility, completed in 2018, is a 350-seat open-air proscenium stage protected by a pavilion roof, which converts in cooler months to a geothermally heated and air-conditioned black box theater seating 99. The new facility is built with technologically advanced systems that can accommodate all levels of artistic needs—from our extensive system of sprung dance floors critical for the safety of movement-based performance to our state-of-the-art lighting and sound capacities. The theater has one of the only fully LED green theatrical lighting systems in the country.
Our new facility sits above a nineteenth-century apple orchard at the apex of over 100 acres of beautiful Hudson Valley land, at the foothills of the Berkshires. Just five acres have been developed; the rest are meadows and woodlands. Nearby are the Dance Barn, a rehearsal and performance venue, and two artists’ residences accommodating sixteen visitors. The PS21 property is also host to the Chatham Farm Animal Rescue.
Venue features

- Building and theater-wide LED lighting
- State-of-the-art projector
- Fully networked audio and visual systems
- Sprung stage floor
- Fixed-pipe grid
- Geothermal heating and air-conditioning
